\*\* Clinical testing on 55 panelists after 8 weeks.

**Dermatologist guided solutions.**

**Allergy tested.  
100% fragrance free.**

**CLINIQUE**

# Even Better Clinical™

## Dark Spot Clearing Serum

CLINIQUE

### Ingredients

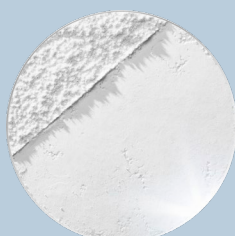

**Visibly Reduces  
Dark Spots**

#### UP302

an ingredient exclusive to Clinique, it delivers brightening benefits and helps slow glycation.

**Reduces the Look  
of Discoloration**

#### Pure Niacinamide

a form of Vitamin B3, is as a multitasker used to help visibly reduce signs of aging and strengthen skin's barrier.

In this formula, it **helps reduce the look of discoloration.**

**Visibly Breaks Up  
Dark Spots**

#### Yeast Extract

#### Trametes Versicolor Extract

is a bio-ferment derived from mushroom that helps **visibly break up dark spots**, along with **yeast**; this formula supports a **more even-looking skin tone.**

**Provides Surface  
Exfoliation**

#### Salicylic Acid

gently sloughs off the uppermost layers of skin to help reveal fresher, smoother, more even-looking skin.

**Delivers Soothing  
Benefits**

#### Gyokuro Green Tea Extract

is rich in anti-oxidants and anti-irritants. Green tea is known to help visibly soothe troubled, irritated skin.

#### Ascorbyl Glucoside + Magnesium Ascorbyl Glucoside

forms of Vitamin C, help provide **potent brightening** activity. Together, they visibly **reduce dark spots** including **post-blemish marks.**

#### Pure Glucosamine

helps weaken bonds that hold dead skin cells together to encourage exfoliation of surface cells.

#### Dipotassium Glycyrrhizate + Licorice Extract

(derivative of licorice) are anti-irritants that help calm skin, visibly reducing the effects of irritation that could trigger dark spots.

### How To Use:

Apply twice daily, morning + night. Dispense 1-2 pumps onto fingertips, spread evenly over face + neck, avoiding eye area. Follow with moisturizer + **daily SPF.**

### Even Better™ Makeup SPF 15

Dermatologist-developed liquid foundation with vitamin C. Visibly reduces dark spots in 12 weeks\*.

\* Clinical testing conducted on 22 panelists after using product for 12 weeks
