

9 Genius Ways to Surge.

5-Minute Moisture Mask

Here's how easy it is to spa-on-the-go (even in a middle seat): Apply a generous amount of Moisture Surge™ 100H to your entire face, then recline and relax. Tissue off. Your skin will look radiant and remain hydrated long after touchdown.

Cuticle Treatment

Caught off guard by how ragged your cuticles look? Tidy them up ASAP with a conditioning dose of Moisture Surge™ 100H. Massage the moisturizer over each nail bed to soften and soothe any dry, rough cuticles.

Frizz Fighter

When your hair suddenly frizzes out and you have no hair serum on hand, rub a dime-sized amount of Moisture Surge™ 100H onto your palms, and then run hands lightly over unruly areas. (Avoid your roots, which may end up looking too flat.)

Dewy Highlighter

Make your features stand out by strategically dabbing Moisture Surge™ 100H along your cheekbones and brow bone. The hydration boost will create a luminous effect.

Dry Spot Soother

The sheer, gel formula is an ideal moisturizer for targeted hydration. Apply a small amount of Moisture Surge™ 100H directly to any dry spots in need of serious hydration. You can even pat it right on top of your makeup.

Sheer Bronzer

The secret to natural looking bronzer? Mix a liquid bronzer, like Sun-Kissed Face Gelee Complexion Multitasker with Moisture Surge™ 100H and then blend it lightly all over your face. This will instantly give your complexion an all over, sun-kissed glow, without any telltale streaking or cakiness.

Delicious Skin Trend

Master the #glazeddonutskin trend, thanks to Moisture Surge's dewy duo: Aloe Bioferment + HA Complex. First, exfoliate away dead skin cells to achieve a smooth base. Then prep skin with Moisture Surge™ 100H, applying a thin layer to the face. This gives your skin a serious moisture boost and doubles as a makeup primer. Next, mix a small amount of face oil into your foundation or press a small amount of oil into your skin after foundation application. Layer highlighter on top of the high points of the face, and you're good to glow.

Ashy Knees Fix

Don't avoid wearing your favorite skirt just because your knees aren't ready to be revealed. Nix knee dryness by applying Moisture Surge™ 100H and spend a few minutes massaging it in for maximum absorption. (Remember, the drier your skin is, the harder it is for moisturizer to penetrate through it.) Presto! Knockout knees.

The Way to Say "I Dew"

Wedding festivities drawing near? Don't forget your trusty wedding day essentials. Pack a handy bridal kit for primping fixes, including a mini multi-tasking Moisture Surge™ 100H for the hydration hacks above.
